Position Title:

Geospacial Web Developer (mid-level)

Location:

MacDill Air Force Base, Tampa, Florida

Salary Maximum (internal)

\$105K/year (salary max)

Position Start Date:

Immediate

Position Requirements:

- Security Clearance: Active U.S. Department of Defense (DoD) Top Secret (TS) Secret Compartmented Information (SCI) security clearance (TS/SCI). SCI eligibility will be considered.
- CompTIA Security+ certification or equivalent DoD 8570 IAT Level II or above compliance (GSEC, SSCP, GCIH, CISA, CISSP, GCED)
- Full-time position (40 hours per week, Monday thru Friday)
- Travel – Less than 10% for training and conferences

Position Description:

This Geospatial Software Engineer position provides website and applications development and maintenance support for the Special Operations Command (SOCOM) located on MacDill AFB in Tampa, Florida.

The successful candidate must be able to work independently, and also in a collaborative environment supporting new code development and implementations, updates, troubleshooting and bug fixing.

Education or Equivalent Training:

Bachelor's Degree in Computer Science, Computer Programming, Application Development or a related discipline, or the equivalent combination of professional training or work experience (7 years as a .NET programmer).

Experience Required:

A working knowledge of the following technologies:

- ArcGIS Server
- ArcGIS (Arc Objects)
- ArcGIS JavaScript API
- .NET
- C#

- SQL
- MS Entity Framework
- IIS
- Apache (Xampp)
- ASP.NET
- CSS
- JavaScript
- SOA Architecture
- Dojo

Experience preferred but not required:

- Angular
- JQuery
- Subversion (SVN) or similar code repository
- Sencha ExtJs
- AutoCAD
- XSL
- XML
- Python

Knowledge and Skills Required:

- Ability to model/design and maintain Relational Databases.
- Knowledge and experience using third-party SDK's.
- Experience working in small teams as well as independently
- Ability to scope large elements of projects and calculate estimated delivery
- Experience communicating pros and cons of alternative solutions to customers; avoiding unnecessary complexity; suggesting creative, breakthrough approaches.
- Ability to learn, diagnose and implement features and bug fixes
- Ability to coordinate with tech leads and software engineers working on related deliverables
- Experience with coding patterns and best practices
- Skills with debugging techniques and ability to find root causes of mysterious problems
- Ability to solve difficult problems
- Ability to communicate ideas and develop strategy through presentations, demonstrations and specifications
- Proven ability to manage multiple projects and assignments and meet deadlines

Interested Applicants should submit their resume & cover letter to HR@metricanet.com
